Statement on Report Preparation

In a letter dated February 3, 2009, the Accrediting Commission for Community and Junior Colleges (ACCJC), Western Association of Schools and Colleges reaffirmed College of the Redwoods' accreditation with the requirement that the College submit a Follow-Up Report by April 1, 2009. The report was to focus on the institution's resolution of a recommendation from the Evaluation Report of December 5, 2008.

President/Superintendent Jeff Marsee appointed a task force to complete the report consisting of Keith Snow-Flamer, Vice President of Student Development; Martha Davis, the Director of Institutional Research; and Cheryl Tucker, the Director of Special Programs. This task force worked with individuals from the Program Review Committee, the Assessment Team, and consultant Fred Trapp to gather relevant information and ensure that collaboration and inclusive dialogue with related functional groups was employed to address the recommendation

Background

College of the Redwoods has been actively engaged in work to meet ACCJC standards in the areas of planning, program review and student learning outcomes for the past two years.

The December 2008 Accreditation Special Visit Team found a college community enthusiastic and hard at work refining planning processes developed during the prior year. When it was learned in February that the college was removed from warning status and its accreditation reaffirmed there was excitement. There was also acknowledgement that there was still a great deal of work to be done, particularly in the areas of program review, assessment, and formal adoption of the Education and Facilities Master Plans.

More than 75 participants from the college and community attended a planning retreat on February 27th to review draft Education and Facilities Master Plans. Feedback on the documents continues to be generated and revisions completed according to a rigorous schedule that will ensure that the final drafts are presented to the Board of Trustees for approval at the May 2009 meeting.

It has been noted in past reports that the college has made positive strides in initial development and implementation of the program review process. As a result, every instructional and non-instructional area completed an annual program review update and 18 of 29 instructional areas completed a comprehensive program review. The recent visiting team found the college's program reviews to be rich in narrative and descriptive information. Currently, comprehensive reviews include an evaluation of course sequencing, program goals and budgets, learning outcomes, as well as some student success and completion data.

During a recent examination of program review, it became evident that the following deficiencies must be addressed if the process is to be used as a key function to inform planning:

- No administrative accountability
- Inadequately expressed student achievement data
- Lack of critical analyses and meaningful dialogue about data that leads to improved student learning
- No program evaluation process

It is recognized that in order to move from the "development" to the "proficiency" level in terms of institutional effectiveness these gaps must be acknowledged and removed. There is a firm commitment to achieving full compliance with the ACCJC standards and realizing the state of sustainable continuous quality improvement in the areas of planning, program review and student learning outcomes.

Recommendation 1 (2008):

The college should determine a template for student achievement data and related analyses that is to be included in all program reviews, and should use the institutional research staff and others knowledgeable about data analyses to guide the faculty and ultimately the college in discussions of what these data show about student success; these discussions should become part of the culture and practice of the institution. (Standards II.A.1a and c, II.A.2.a, II.A.2.e)

Description of Steps Taken to Resolve the Recommendation

To ensure the deficiencies outlined in the Special Visit Report of December 5th, 2008 are completely resolved, a new administrative structure will be in place by summer 2009. The incoming administrative team includes Vice President and Dean level responsibility related to program review, assessment and evaluation (Appendix A).

To address the recommendation for further improvement of the college's program review and assessment efforts, the Institutional Research Director, in consultation with Fred Trapp, worked with existing functional groups as well as temporary work groups to evaluate efforts of the current processes and make recommendations for change. Faculty, administrators and staff from the program review Committee, Assessment Team, Basic Skills Committee and Student Services participated in this work.

The following topics were discussed in depth: operationally defining programs of study; the focus and purpose of program review; the process for change and feedback; and the program review cycle and schedule. Process mapping and flow charts of the current process were utilized to further identify issues of concern. As a result of this work, three key areas of program review were targeted for transformation: the template, process and evaluation.

Program Review Template:

It was determined that the flow of information in the current format does not lead to an analysis of trends and data driven conclusions. Additional quantitative data will allow for more meaningful dialogue leading to improvement in student learning. Information will include longitudinal data on student retention, persistence, and course completion. Program and student learning outcomes need to be provided as well as benchmarking. In addition, program review will benchmark CR programs compared to other similar institutions in northwest California. Program review data will provide alignment with the Education Master Plan by providing access and success data related to Full Time Equivalent Students (FTES) and Accountability Report for the Community Colleges (ARCC) measures. IR is currently examining the viability of utilizing CalPASS with internal data to provide enhanced information.

CR will perform three distinct types of program review: instructional, administrative, and student services.

Instructional program reviews will include the following measures:

- Student Learning Outcomes (SLOs)
- Program Learning Outcomes (PLOs)
- Faculty to student ratios
- Access (FTES) and success (ARCC) measures
- Enrollment by course
- Benchmarking

- Staff development participation
- Financial Assessment

Administrative program reviews will include measurements of:

- Efficiency
- Customer satisfaction
- Expected versus delivered services
- Benchmarks of similar functions with other institutions
- Financial Assessment

Student Development program review measures will provide a combination of learning outcome and process review that include:

- Effectiveness
- Student satisfaction
- Employee satisfaction
- Student Learning Outcomes
- Program Learning Outcomes
- Staff to student ratios
- Enrollment by course
- Benchmarking
- Trends
- Efficiency
- Financial Analyses

Program Review Process:

Currently, every discipline within instruction, student development and administrative services completes either an annual or comprehensive program review each year that are similar in many respects. This method has placed a strain on the abilities of the IR department to provide assistance in extracting and analyzing the program review data provided on the web for faculty and staff.

To strengthen the program review process, it is proposed that the following will undergo a comprehensive review every four years:

- Every course of study leading to a degree or certificate
- Basic Skills
- General Education grouped by division

Administrative Services and Student Development programs will complete comprehensive reviews every three years.

The revised program review calendar alternates units in a structure that allows for an even division of labor. Programs will be uniformly reviewed on multiple dimensions to ensure that relationships between instructional and support services that are vital to student success are evaluated and improved upon.

Annual unit planning documents are under revision to promote more effective use for monitoring progress towards goals, addressing resource requests and providing a venue for communicating concerns as needed.

Another deficiency is the lack of administrative review, follow-up, and responsibility related to program review. The role of the Program Review Committee as it relates to accountability is unclear. This will be addressed by the new administrative structure and new procedures being implemented.

Evaluation:

The college lacks a clear administrative and consultative process of program evaluation for the purpose of program support, revitalization or elimination. It is recognized although the process of program evaluation is separate from program review, there are opportunities provided by the program review process for recognizing needs related to program vitality.

It is proposed that the Program Review Committee provide bi-annual reports to identify programs that required further evaluation based on data driven criteria related to student access and success. Once the criteria have been identified and administrative support structure established, the process will be linked to planning and budget development.

Assessment Work:

In addition to the focused work on improving program review, the college has also continued to make progress in the development of student learning outcomes and use of assessment for the improvement of learning and institutional effectiveness. Recent Enrollment Management Retreats were engaged in process mapping and flowcharts that resulted in the creation and implementation of action plans related to program and student learning outcomes.

The Assessment Team has communicated with faculty about the importance of adhering to the 2002 ACCJC Accreditation standards requiring that student learning outcomes be assessed at the course, program, and degree level. Faculty who were unable to document completion of the assessment loop (conduct assessment, summarize the results, use results to improve the teaching-learning process) on their program review forms in the Fall 2008 have been strongly encouraged to conduct authentic assessment during Spring 2009 to comply with ACCJC standards.

A half day faculty flex activity was provided on January 16th to facilitate work sessions for the new liberal arts associate degrees. Another retreat facilitated by Fred Trapp on March 27th concentrated on developing learning outcomes for general education.

An Assessment Software Task Force with members from Institutional Research, Instructional Technology, Title III and the Assessment Team was directed to review learning outcomes assessment software, communicate their findings to the college community, assess feedback and make a final recommendation by May 31st.

Conclusion

A major function of Program Review will be to ensure alignment between the goals and priorities of the college and the actual practices within programs and services. To support this effort, program review will include quantifiable targets and analysis of trends related to student achievement, access (FTES), and success (ARCC).

Institutional Research redesigned instructional and non instructional program review templates to include student achievement data and department efficiency measures which will provide alignment with the Educational Master Plan (Appendix C). In addition to accessible data, guidance and training

will be provided to program review participants to promote dialogue for the purpose of improving the quality of learning.

The College is completing the Education and Facilities Master Plans. The plans will be forwarded to the Board of Trustees for a final reading at their May meeting.

Analysis:

Implementation of the revised program review process will provide a framework for district wide discussion related to the improvement of learning. Further collaboration and ongoing progress related to program review, assessment and planning will occur to fully resolve the recommendation. The college leadership is committed to improving structures for communication and positive dialogue for this purpose.

Evidence

- Appendix A: New Administrative Organizational Charts
- Appendix B: Program review inadequacies identified
- Appendix C: Revised program review forms/templates
- Appendix D: Proposed program review guidelines
- Appendix E: Flow chart for improved program review process
- Appendix F: New calendar and timelines for program review
- Appendix G: Annual Planning Priorities flow chart
- Appendix H: Program Review Response Team Activity Calendar

Additional Plans

District wide communication and collaboration on the proposed changes to program review will occur through the Spring 2009 semester. Feedback will be incorporated into the final revisions during the summer for further review and pilot testing of the process in September 2009.

A significant effort is also underway to improve the process of accurately placing students into program of study. In addition to the recent purchase of E-Advising Suite for the institutions Colleague Datatel database, four advisors and two faculty counselors will be added to the Counseling Department by the Fall of 2009 to ensure that data related to student achievement in programs is current, accurate and complete.

Fred Trapp will continue to work with the college on long term planning through 2012 with the goal of reaching the stage of sustainable continuous quality improvement in the areas of planning, program review and assessment

Template/Forms

1. Program reviews are not completed by all programs leading to transfer or AA/AS
2. Schedule needs to be revised
3. Flow of form does not lead to analysis of trends and data driven conclusions
4. No link between program review and educational master plan
5. Success (FTES) and access (ARCC) measures
6. Distinction between program review and resource requests

Process

1. Currently reviewing discipline, should review programs
2. Identification of Programs
3. Putting student into programs
4. Program review schedule
5. Data population in forms- data fields
6. Initial analysis of data
7. No administrative review, lack of responsibility and accountability, clarify role of PRC
8. Separation of program review and resource allocation process
9. Non- instructional review too tied to instructional
10. Move from qualitative reviews to quantitative reviews
11. Separate Instructional from non- instructional evaluation process
12. Pre-review process, support and communication
13. Sequencing, what is evaluated and when
14. No linkage addressing indicators in Ed Plan (Access and Success)
15. Annual plan (budget and resource request) needs to be separate

Evaluation

1. Lack of clear process of how program reviews are evaluated
2. Needs to be administrative and consultative
3. need to identify criteria used to evaluate reviews
4. Process for developing planning priorities and budget development
5. Identify timeline of when important decisions are made
6. Identify evaluation criteria and how those trigger further actions
7. Who makes decision that program needs more or less resources?
8. No teeth in program review process, who evaluates and makes recommendations?
9. Ensure that program reviews have integrity
10. Link between program review evaluation and program discontinuance
11. SLO and PLO, What they are, how they're measured, how its embedded into program review
12. ARCC data not identified (Access and Success), including scorecard
13. Planning horizon outlined in program review should be focused on long term, where as resource allocation process should outline short term needs

Responding to Questions

The document includes questions to which programs respond. After each question is an answer box. If you type your response in the answer box, it will expand to contain your complete answer. Any kind of formatting can be included in the answer box, including different typefaces. Some formatting (such as bulleted lists) can affect the borders of the answer box, but this can be cleaned up using the usual Word formatting commands.

Overview

Please give a brief overview of your instructional program. Describe the relationship of your program to the mission of the college.

College of the Redwoods Mission Statement

The Redwoods Community College District has a commitment both to our students and to our community. We are committed to maximizing the success of each student with the expectation that each student will meet her or his educational goal, achieve appropriate learning outcomes in his/her courses and programs, and develop an appreciation for life-long learning. In partnership with other local agencies, we are also committed to enriching the economic vitality of the community whom we serve. The following are three equally important, primary missions of the Redwoods Community College District:

1. Associate Degree and Certificate Programs
2. Academic and Transfer Education
3. Professional and Technical Education

Learning Outcomes & Curriculum

This section relates to the following goal(s) of the college

Strategic Master Plan:

Goal 1: Enable student attainment of educational goals

2.01. Program and Student Learning Outcomes

1. List each Program Learning Outcome in your program, courses where those outcomes are to be achieved, and indicate your progress through the PLOAC (Program Learning Outcomes & Assessment Cycle).

PLO	Course	Assessment Type	Assessment Analysis	Changes resulting from Analysis

2. List each course in your program and indicate with check marks your progress through the SLOAC (Student Learning Outcomes & Assessment Cycle).

Course	SLOs in progress “-”	Assessment done	Assessment data analyzed	for planning	How many cycles

2. Describe how you have used your assessment data analysis for program improvement.

**2.02. Pre/Co-requisites: Pre-requisites, Co-requisites,
and Advisories on Recommended Preparation**

Instructions: Analyze the data provided on prerequisites, co-requisites, and advisories on recommended preparation to answer the following questions.

Courses with prerequisites or requirements:

Course	Prerequisite	Co-Requisites	Requires Validation

Course Sequence leading to degree or certificate:

Course #	Course Title	Units	Lecture Hours	Lab Hours	Required Preparation

1a. Would adding a prerequisite or advisory to any course within the program increase the success rate in the course?

1b. Are there any drawbacks to adding a prerequisite or advisory to any such course? Comment.

2. What review of the course content has been done for these courses and their prerequisites and advisories?

The college will review each prerequisite or advisory on recommended preparation or limitation on enrollment as a part of the comprehensive program review process.

Section 3

Program Management

This section relates to the following goal(s) of the college

Strategic Master Plan:

- Goal 2:** Develop and manage human, physical and financial resources to effectively support the learning environment
- Goal 3:** Build a culture of assessment

3.01. Efficiency (FTES, WSCH, FTEF, FTES per FTEF)

Instructions: Analyze the FTES, WSCH (Weekly Student Contact Hours), FTEF, and WSCH per FTEF (Full-Time Equivalent Faculty) data provided by Institutional Research and answer the following questions.

Table 3.01A. FTES, FTEF, and Efficiency
(Fall and Spring semesters only)

	2005 2006	2006 2007	2007 2008
Program FTES			
Program WSCH			
Program FTEF			
Program FTES per FTEF			

1. Comment on the trends in Table 3.01A above.

2. What else (if anything) is indicated by the program data? Identify any important trends and explain if necessary.

3. Do any instructors meet or work with students in hours not included in WSCH? Would it be useful to the program in any way to try to get WSCH credit for these hours? Explain.

Section 4

Faculty

This section relates to the following goal(s) of the college

Strategic Master Plan:

Goal 1: Enable student attainment of educational goals

Goal 2: Develop and manage human, physical and financial resources to effectively support the learning environment

4.01. FTEF, Adjunct FTEF, and FT/PT Ratio

Instructions: Analyze the data on FTEF, adjunct FTEF, and the full-time/part-time ratio provided by Institutional Research and answer the following questions.

Table 4.01A. FTEF and Full-Time/Part-Time Ratio

(Fall and Spring semesters only)

	2004- 2005	2005- 2006	2006- 2007
Full-Time FTEF			
Adjunct FTEF			
% Full-Time			
All Credit % Full-Time			

>Insert language referencing the State's 75% ratio rule<

1. What do the program data indicate? Identify any important trends and explain if necessary.

2. Does the FT/PT ratio affect the program? Comment.

3. Given the data from this section, outline a case to made (if one exists) for increasing the faculty in your program.

4.02. Teaching/Service Time

Instructions: Fill in the data below and answer the questions that follow.

Table 4.02A. Teaching/Service Time

FT Instructor Name	Currently on leave (yes/no)	Retired in last 2 years	FT hired in last 3 years	Load Reduction

1. Given the data, how have these activities impacted the program?

2. Will these and any other activities affect the program in the future?

3. How many faculty are anticipated to retire within the next 3 years?

4.03. Projected Staffing/Faculty Needs

Instructions: Review and analyze the data on faculty matters provided in this section, plus your responses to the previous personnel questions, and answer the following questions.

Employee Name	Position	FT/PT	Hours/Week	Duties

1. Discuss any trends that will impact your projected staffing needs.

2. Discuss any trends that will impact your projected faculty needs.

--

4.04. FT Faculty Qualifications and Development Activities

Instructions: Administer to program faculty the survey provided by Institutional Research. Analyze the responses and other information and fill in the data below.

Table 4.04A. Faculty Qualifications and Development Activities

FT Instructor Name	Highest Degree	Service Years	Recent Professional Development Activities	Recent Workshops/Courses Taken	Funding Source for Professional Development

1. How do the Professional Development Activities above directly relate to the goals or interests of the program and the mission of the college?

--

2. What steps are recommended for improvement, if any?

--

4.05. Committee Participation

Instructions: For the period since the last program review (or the last six years), fill in the data below for each full-time faculty member and answer the questions that follow.

Table 4.05A. Committee & Campus Participation

FT Instructor Name	CR Committees or other Campus Participation	Other Professional Service

Section 5

Plans

This section relates to the following goal(s) of the college

Strategic Master Plan:

- Goal 1:** Enable student attainment of educational goals
- Goal 2:** Develop and manage human, physical and financial resources to effectively support the learning environment
- Goal 3:** Build a culture of assessment
- Goal 4:** Contribute to the economic, cultural and social well-being of the North coast community
- Goal 5:** Ensure student access

5.01. Planning Assessment

Reflect on your previous planning process.

Please list goals and measurable objectives related to your discipline or program of study leading to a degree or certificate.

List those goals that have been accomplished to date. How did the implementation of these plans improve your program?

Author(s): _____

Dean / V. P.: _____

Validation Date: _____

Responding to Questions

The document includes questions to which programs respond. After each question is an answer box. If you type your response in the answer box, it will expand to contain your complete answer. Any kind of formatting can be included in the answer box, including different typefaces. Some formatting (such as bulleted lists) can affect the borders of the answer box, but this can be cleaned up using the usual Word formatting commands.

For information on Program Review:

Overview

Please give a brief overview of your program. Describe the relationship of your program to the mission of the college.

College of the Redwoods Mission Statement

The Redwoods Community College District has a commitment both to our students and to our community. We are committed to maximizing the success of each student with the expectation that each student will meet her or his educational goal, achieve appropriate learning outcomes in his/her courses and programs, and develop an appreciation for life-long learning. In partnership with other local agencies, we are also committed to enriching the economic vitality of the community whom we serve. The following are three equally important, primary missions of the Redwoods Community College District:

1. Associate Degree and Certificate Programs
2. Academic and Transfer Education
3. Professional and Technical Education

Section 5.03. Resources Needed to Support Program

--

Appendix D: Proposed Program Review Guidelines

Focus and Purpose of Program Review

Program quality and improvement are the primary focus of program review. The specific purpose of program review is:

- To evaluate instructional programs and support services within the context of the mission and goals of the College.
- To improve the quality of instruction and services, to meet accountability mandates and to demonstrate institutional effectiveness.
- To identify the goals and plans for any improvements or changes that will enhance student learning outcomes and overall program efficiency.
- To more closely connect the program review, assessment, and planning functions.
- To recommend more effective and efficient utilization of college resources.
- To ensure that student success and achievement is more thoroughly discussed.
- To provide a means for tracking and evaluating the actions taken to improve program effectiveness and efficiency.
- To identify trends within a program.
- To review all degrees and certificates while continuing to review disciplines.
- To serve as a basis to assist the college in initiation, expansion, reduction, consolidation and discontinuation of programs and services.
- To allow the entire college community to evaluate its own areas of strength and challenges so that the college can better set priorities to meet the student and community needs of the community.
- To evaluate the college's progress in addressing basic skills education in programs, courses, and disciplines.

Characteristics of program reviews:

- Reviews are forward thinking.
- Reviews are evaluative, not just descriptive. Plans for improvement require judgment on the program, students, curriculum, learning outcomes, resources and future directions.
- Reviews provide a concise, honest appraisal of a program and department/discipline's strengths and weaknesses.
- Reviews must incorporate the criteria for evaluating efforts in basic skills education and learning outcomes into the criteria for all instructional program reviews

Program Review Results

Program review recommendations are a major component of the college planning processes which is designed to lead to effective use of resources and should increase the quality of instruction and services based upon institutional, program, degree, and course learning outcomes. The information gathered will provide critical internal data about size and stability of program, current and future resource needs, market demand, equipment and space needs, strengths and weaknesses, and how the program relates to the mission of the College and the Strategic, Educational and Facilities Plans.

Reviews culminate in recommendations developed by the program review Committee in consultation with the appropriate director or dean. The recommendations are communicated to the Coordinated Planning Council and the Cabinet. The recommendation may include a summary statement indicating the strength of program or a statement recommending placing the program in one of the following five categories:

- recommend program expansion;
- recommend continuation of program in current form;
- recommend program continuation, but with adjustments to current funding level and/or program modifications;
- recommend special attention to program and continuing review; or
- recommend the program be discontinued

Program Discontinuance

The process of Program Discontinuance is separate and distinct from program review. The purpose of the Program Discontinuance process is to determine the vitality and continued viability of a program in response to concerns identified during the program review process or in response to significant changes in enrollment or fiscal concerns.

Program Review Cycle

Comprehensive program review is conducted by each academic instructional unit every four years and every vocational and student services/administrative unit every three years based on a schedule maintained by the Program Review Committee. Annual program reviews are conducted by each operational unit every year.

Assistance for completing the review

Assessing and setting goals for a program or academic division should be the result of internal discussion, but the supervising administrator will provide assistance with the process. In addition, the Office of Institutional Research will provide data that will be used in completing program reviews.

Analysis of Program Status

It is important that criteria be developed and broadly accepted about how program review/planning information will be used. Therefore, a system for recognizing exemplary programs or alerting programs in which problems may exist or are developing is imperative.

1. Recognition or Alerts For Instructional Programs

- FTEF: If the faculty load in the program falls below the College average of the prior year or is consistently above the College average.
- Cost/FTES: If the cost per FTES for the program is above or below the income the College receives per FTES.
- Retention: If the retention rate for the program is below or above the College average. Either condition could reflect positively or negatively on the program depending on other extenuating factors such as the discipline involved, grading patterns, or entry level of students.

- Growth Trend: If the growth rate in FTES is below or above the overall College growth rate for the prior year.
- Apportionment Income: If the income to the program has decreased or increased since the previous academic year.
- Significant decline in labor market
- Incongruence of program with college mission and goals, state mandates, etc...

2. Recognition or Alerts for Support Service Areas

- Cost/FTES: If the cost per FTES for the program is above or below the income the College receives per FTES.
- Growth Trend: If the growth rate in FTES is below or above the overall College growth rate for the prior year.
- Productivity: A productivity measure developed by the area administrator in consultation with staff.

3. Use Of Alerts For Program Review Process

Generally, alerts will indicate that further review is needed. Program staff in areas with alerts will make specific recommendations to address the problem areas. These recommendations then become goals and objectives for the program during the next academic year. If the goals are not met, specific recommendations about the future of the program will be made by the area administrator and the Program Review Committee.

4. Use Of Recognition or Alerts For Budget Development

Programs with alerts will provide detailed justifications to the Budget Development and Committee for funding requests. Curriculum changes proposed by these programs that involve increased expenditures will be carefully reviewed by the Curriculum Committee.

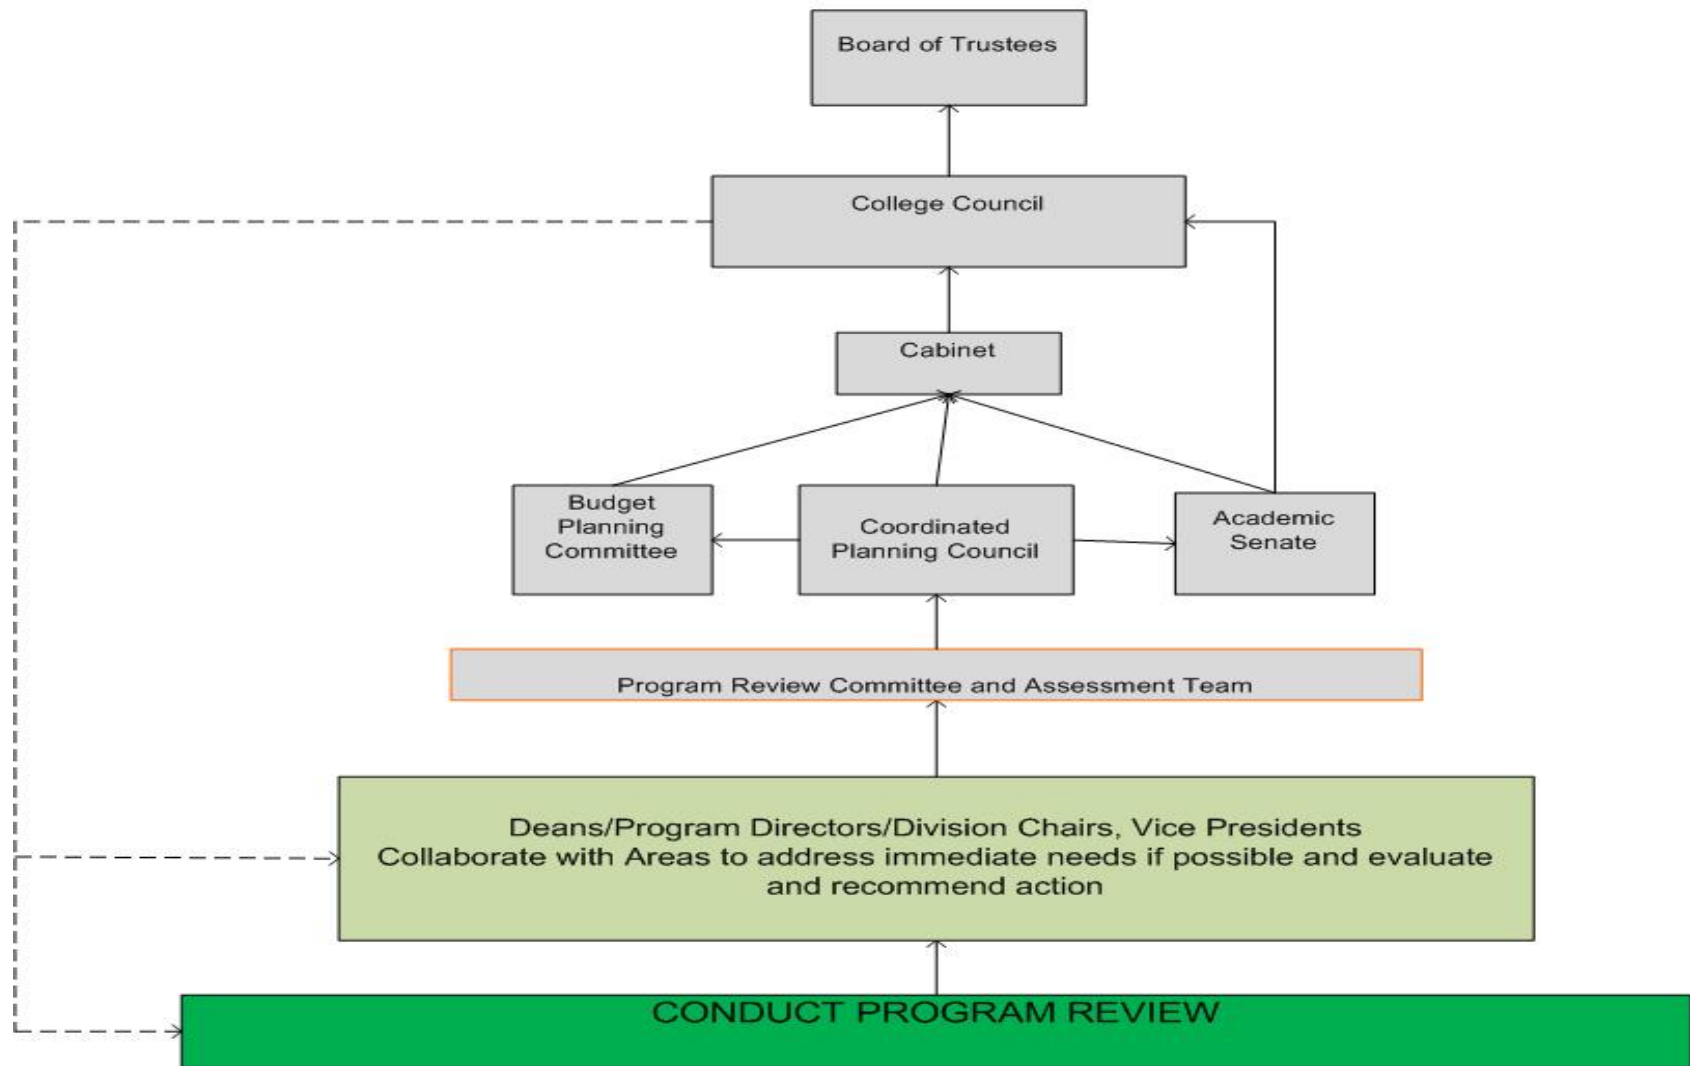

Program Review Committee

The Program Review Committee will be responsible for the design of the review process and format and for the selection of the review panels for each program review. Any revisions in the review process or format will be submitted to the Cabinet and Academic Senate for review and approval.

A Program Review Panel will be selected for each program review. The panel will act as a subcommittee of the Program Review Committee. Members of the panel will be appointed by the committee with the concurrence of the Academic Senate and the Cabinet. The panels will be responsible for carrying out the program review and for making recommendations to the Program Review Committee. Each panel will be chaired by an experienced member from the Program Review Committee who is not in the same unit as the program to be reviewed.

Input from external reviewers is a desirable aspect of program review in that it provides an evaluative opinion from others in the field, ensures objectivity, helps provide perspectives concerning the program's relationship to the
