Suggested Program Sequence

For information about the program length and suggested sequence of courses for this degree, please see an Academic Advisor.

Program Learning Outcomes

- The student will implement nursing care to patients, families, and groups from diverse backgrounds in a variety of settings that is compassionate, age and culturally appropriate and based on a patient's preferences, values and needs.
- The student will participate as a member of the interprofessional healthcare team in the provision of safe, quality patient-centered care.
- The student will identify best current evidence from scientific and other credible sources as a basis for developing individualized patient-centered plans of care.
- The student will participate in data collection processes that support established quality improvement initiatives.
- The student will implement strategies that minimize risk and provide a safe environment for patients, self, and others.
- The student will use evidence-based information and patient care technology in the provision of safe, quality patient centered care.
- The student will practice nursing in a professional, ethical, and legal manner while providing patient-centered standard-based nursing care.
- The student will describe how leadership, management, and priority- setting skills are used to support safe, quality patient-centered care.
- The student will identify the relationship between microsystems and macrosystems in healthcare.
