

Coping Strategies for Stress

Try these when you're feeling anxious or stressed:

- **Take a time-out.** Practice yoga, listen to music, meditate, get a massage, or learn relaxation techniques. Stepping back from the problem helps clear your head.
- **Eat well-balanced meals.** Do not skip any meals. Do keep healthful, energy-boosting snacks on hand.
- **Limit alcohol and caffeine,** which can aggravate anxiety and trigger panic attacks.
- **Get enough sleep.** When stressed, your body needs additional sleep and rest.
- **Exercise daily** to help you feel good and maintain your health. Check out the fitness tips below.
- **Take deep breaths.** Inhale and exhale slowly.
- **Count to 10 slowly.** Repeat, and count to 20 if necessary.
- **Do your best.** Instead of aiming for perfection, which isn't possible, be proud of however close you get.
- **Accept that you cannot control everything.** Put your stress in perspective: Is it really as bad as you think?
- **Welcome humor.** A good laugh goes a long way.
- **Maintain a positive attitude.** Make an effort to replace negative thoughts with positive ones.
- **Get involved.** Volunteer or find another way to be active in your community, which creates a support network and gives you a break from everyday stress.
- **Learn what triggers your anxiety.** Is it work, family, school, or something else you can identify? Write in a journal when you're feeling stressed or anxious, and look for a pattern.
- **Talk to someone.** Tell friends and family you're feeling overwhelmed, and let them know how they can help you. Talk to a physician or therapist for professional help.

Fitness Tips: Stay Healthy, Manage Stress

For the biggest benefits of exercise, try to include at least 2½ hours of moderate-intensity physical activity (e.g. brisk walking) each week, 1¼ hours of a vigorous-intensity activity (such as jogging or swimming laps), or a combination of the two.

- **5 X 30:** Jog, walk, bike, or dance three to five times a week for 30 minutes.
- **Set small daily goals** and aim for daily consistency rather than perfect workouts. It's better to walk every day for 15-20 minutes than to wait until the weekend for a three-hour fitness marathon. Lots of scientific data suggests that frequency is most important.
- **Find forms of exercise** that are fun or enjoyable. Extroverted people often like classes and group activities. People who are more introverted often prefer solo pursuits.
- **Distract yourself** with an iPod or other portable media player to download audiobooks, podcasts, or music. Many people find it's more fun to exercise while listening to something they enjoy.
- **Recruit** an "exercise buddy." It's often easier to stick to your exercise routine when you have to stay committed to a friend, partner, or colleague.

Be patient when you start a new exercise program. It can take about four to eight weeks to feel coordinated and sufficiently in shape so that exercise feels easier.
