Note taking: You are expected to take notes during all classes and encouraged to take notes on the reading assignments. It is crucial to your success as a student that you learn to take notes that are adequate and precise. The ability to take "good" notes requires that you use two clearly defined skills: summarizing - being aware of the main idea or theme of the topic being discussed and of the major points offered in support of the main theme - and paraphrasing - restating these

ideas in your own words. The best way to develop these skills through practice, and we will do some activities in class to help you develop them.

Code of Conduct: See Catalogue.

Class Participation (Question of the day/ In class writing **40 points** (2 point/day)

The aim of this course is to develop your interest and ability to think. Bertrand Russell once said, "Most people would rather die than think - and most do!" Thinking and reflection are essential for our survival and for our development as mature, aware human beings. The best way for you to develop and sharpen your capacity to think is for you to be actively involved in the classes. This means not only being attentive in class, but also participating in the class discussions. Thoughtful participation in class will be an important consideration in the final grade you receive in the course.

Homework 30 points (2 points /each)

There will be frequent reading and writing assignments in this class. Homework is an important part of the course in terms of learning and also your grade, and it must be completed before the beginning of class.

Examinations 30 points (15 points /exam)

There will be two examinations during the course. The questions will be in the form of short essays and will require that you demonstrate the thinking abilities that you have acquired. They will test for your understanding of important concepts that we have studied, the ways that you work with ideas, and your ability to express your thinking clearly and coherently.
