Course Description:

Students learn to identify and examine social problems using a sociological perspective. Sociological concepts and theories are used to analyze social problems. This course requires critical reading and analysis

- 2. Explain how two or more social problems are related.
- **3.** Use course tools to propose a potential solution for a social problem related to gender, selfidentity, ethnicity, race, socio economic status, sexuality, world view, collective behavior and/or values

Commitment:

This is a reading and critical thinking intensive course model.

In any of my 16 week courses, you can expect to spend about <u>9 to 11 hours per week every week</u> concentrating on activities for Sociology. In an online course, you can expect to spend *at least* this much time. In a shorter summer session intensive or late start class you can anticipate spending *at least double* this amount of time on half or more of the term weeks.

- For students working on basic study skills, *even more time* may be needed to work on personal academic skills such as reading retention, exam or quiz prep approaches, information management & large assignment self-pacing;
- Each week will involve reading course texts, engaging with online lecture material, and participating in online activities such as quizzes, interactive learning modules & discussion boards

Necessary Computer Skills :

Online classes require computer skills. It is your responsibility to meet technological skill levels required for and technological challenges associated with your success in this class.

Skills needed for this class include ability to:
